

Facility Training Matrix

PEDIATRIC SURGE PREPAREDNESS

This is an example training matrix for health care facility staff. It should be modified by facilities according to their resources and role in the community during a pediatric surge incident.

	Awareness	Knowledge	Proficiency
	Healthcare assistants, aides, respiratory therapy, selected providers and in-house nursing staff	Physicians, nurses, other providers with a disaster response role	Physicians, nurses, other providers expected to provide pediatric emergency care on a routine basis
Orientation materials – equipment location, facility plan summary	X	X	X
Introduction to pediatric preparedness	X	X	X
Scenario discussion		X	X
Skill stations / simulation			X
Certification*			X

*Certification requirements are determined by the institution via their job requirements / privileging (for example – Advanced Pediatric Life Support (APLS) certification)
