We get all of our healthcare through Healthpartners, Regions Hospital has been our preferred hospital over the years for care. We are so thankful for the care we have received at Regions. My 27 year old son herniated a disk in his cervical spine, the care he received was amazing and the ability to have access to the level of care provided at Regions was crucial to his full recovery. Regions hospital is a gift to our community and any additional beds that this hospital needs to provide exceptional care to other members of the state and community should be approved. The doctors at this hospital provide much needed care for so many members of the community no matter the situation.

Sincerely,  
Rena Olesen
