

# Induced Abortions in Minnesota, January-December 2024

## REPORT TO THE LEGISLATURE

December 31, 2025

\*All tables revised on January 2, 2026, to correct an overcount of 2,586 duplicated records submitted into the Minnesota Registration and Certification (MR&C) System.

## **Induced Abortions in Minnesota, January-December 2024: Report to the Legislature**

## Introduction

This report is issued in compliance with Minnesota Statutes section 145.4134, which requires a yearly public report of induced abortion statistics for the previous calendar year and statistics for prior years adjusted to reflect any additional information from late and/or corrected report forms, beginning with October 1, 1998, data. This report covers the period from January 1 through December 31, 2024, as well as updated numbers for the calendar year 2023.

## History

The 1998 Minnesota Legislature amended Minnesota's abortion reporting requirement to include all physicians licensed and practicing in Minnesota who perform abortions and all Minnesota facilities in which abortions are performed (Minn. Stat. § 145.413 and 145.4134). A report must be completed and submitted to the Minnesota Department of Health (MDH) for each procedure performed. This law also expanded the content of the reporting form. The *Report of Induced Abortion* form is included in the Appendix of this publication.

In 2023, the Minnesota Legislature repealed Minn. Stat. § 145.413, 145.4132, 145.4133, 145.4135, and 145.4136. Additionally, Minn. Stat. § 145.4131, 145.4134, and 145.423 were amended. The text of these amended statutes can be found in the Appendix of this publication. Details of additional changes can be found in the technical notes.

## Technical notes

Data included in this report are submitted to the Minnesota Department of Health by facilities and physicians who perform abortions in Minnesota. From the inception of abortion reporting through the 2016 reporting year, reporting was done on paper forms that were mailed to the Minnesota Department of Health for data entry. A secure web-based abortion reporting system was launched in March of 2017 as a module of the Minnesota Registration & Certification system (MR&C). Reporting forms were also updated at this time in accordance with national standards and Minnesota Statute requirements. Key elements that were removed or changed from any of the current and previous reporting forms are summarized below.

In 2023, the Minnesota State Legislature made significant changes to data collection and reporting requirements that were enacted mid-year. Significant changes to the forms and statutes are listed in this section. All listed forms and statutes are provided in the way providers saw them in 2023.

In July of 2025, Centers for Disease Control and Prevention (CDC) ceased the collection and reporting of abortion data at a national level. In alignment with CDC's reporting guidance MDH has removed what was formerly tables 12a-12c from this report for both 2024 and 2023.<sup>1</sup>

---

<sup>1</sup> Tables on previous number of live births and abortions were removed to reflect CDC guidance that was in effect from July 16, 2025 through December 18, 2025. MDH is working to confirm and clarify updated reporting requirements and ensure alignment with CDC. Tables will be updated and reflected accordingly in future reports.

## Forms and statute changes

### Report of Induced Abortion form

In 2023, Minn. Stat. § 145.4131 was amended to remove the following required reporting items:

- the specific reason for the abortion
- the number of prior induced abortions
- the number of prior spontaneous abortions
- the method of payment
- type of insurance coverage
- whether the abortion resulted in a born alive infant
- any medical actions taken to preserve the life of the born alive infant
- whether the born alive infant survived; and
- the status of the born alive infant, should the infant survive, if known

As a result, reporting of these fields is no longer required and historical tables addressing “payment type and health insurance coverage,” “reason for abortion,” and “other reason for abortion,” as seen in prior year reports have been removed from this year’s report. While no longer required, in the interest of public health, the number of prior induced and spontaneous abortions will continue to be collected for reporting to the Centers for Disease Control and Prevention (CDC) and can be found in Table 12 of this report. With reporting forms changing mid-year, both versions of the form can be found in this appendix. Additionally, physicians were required to begin collecting annual data on January 1 and to submit their annual data to MDH by September 30 of the subsequent year.

### Report of Complication(s) from Induced Abortion form

In 2023, Minn. Stat. § 145.4132 was repealed. As reporting of complications is no longer required, historical tables addressing “postoperative complications” as seen in reports prior to this report have been removed from this report.

### Report of Out of State Abortions Paid with State Funds

In 2023, Minn. Stat. § 145.4133 was repealed. As reporting of out-of-state procedures paid partially or fully is no longer required, tables addressing “induced abortions – performed out of state and paid with state funds,” as seen in prior year reports have been removed from this report.

### Report of Informed Consent Related to Induced Abortion form

In 2023, Minn. Stat. § 145.4242 and 145.4243 were repealed. As informed consent is no longer required, historical tables addressing “medical risks information, informed consent,” “medical assistance/printed materials information, informed consent,” and “patient access to printed materials, informed consent,” as seen in prior year reports have been removed from this report.

## Report of Born Alive Infants

In 2023, the Minnesota Legislature repealed the Women's Right to Know Act as well as Minn. Stat. § 145.4132. Minn. Stat. § 145.4131 was amended to remove data collection on this field. As reporting of complications is no longer required, historical tables addressing "postoperative complications" as seen in prior year reports have been removed from this report.

## Release of the Commissioner's public report

In 2023, Minn. Stat. § 145.4134 amended the release of data for the Commissioner's public report from July 31 to December 31.

## Data confidentiality

Due to the sensitivity of abortion data, there are concerns about revealing individuals' (patient or provider) identity from data presented in this publication. In 2023, Minn. Stat. § 145.4134 was revised to reflect the repeal of previously referenced statutes and now states:

*"The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the forms under section 145.4131 must be included on the public report except that the commissioner shall maintain as confidential, data which alone or in combination may constitute information from which an individual having performed or having had an abortion may be identified using epidemiologic principles."*

Data generally are suppressed when there are such small numbers of two or more variables that it would be difficult to protect the confidentiality of individuals. For instance, age groups tallied for only a single town in Minnesota would most likely have small counts in some of the age groups. Likewise, a table of age group by race for each county in Minnesota would have small counts in cells for those counties with small populations and few minority residents. Suppression of those small counts is necessary to protect the confidentiality of the individual.

Data by provider, Tables 1.1 and 1.2, are presented for individual clinics that have been publicly identified as abortion providers but aggregated into a single group for independently reporting physicians. Table 1.2 presents data on individual physicians with no small-number suppression, as the law requires counts by physician by month. Physicians are identified as Physician A, B, C, etc. to protect confidentiality. The identifiers are arbitrarily assigned to those physicians who reported in a given calendar year. Thus, Physician X in a prior year's report may not be the same as Physician X in this report. Data presented in frequency tables for the state as a whole have few small-number data suppressed and are noted when present. Table 6, Country/State Residence of Woman, has historically had sufficiently large groups to obscure identification of an individual, but in order to expand data reporting, additional states with 10 or more cases and those from Canada are reported. Table 7, County of Residence for Women Residing in Minnesota, is the only table where counts of zero to five are suppressed. Some of the counties have a small population of females of childbearing age and/or a small number of physicians who may be qualified to provide abortion services and thus, though unlikely, it could be possible for a provider or patient to be identified. A full update of 2023 numbers are reported in the appendices.

## Tables – 2024 Data

<b>Total</b>	<b>13,729</b>	<b>10,969</b>

**Table 13. Method of disposal of fetal remains, 2024**

Method of disposal of fetal remains is required to be reported only for those fetuses having reached the developmental stage outlined in Minn. Stat. § 145.1621, subd. 2. Thus, not all reports contained this information.

Method of disposal of fetal remains	Occurring in Minnesota	Minnesota residents
<b>Cremation</b>	3,699	2,995
<b>Burial</b>	44	32
<b>No fetal remains</b>	9,986	7,942
<b>Total</b>	<b>13,729</b>	<b>10,969</b>

**Table 14. Intraoperative complications, 2024**

Complication occurring at the time of the abortion procedure. Complication reporting allows marking all that apply; thus, totals may not match the total number of abortions and so are not shown.

Intraoperative complication	Occurring in Minnesota	Minnesota residents
<b>No complications</b>	13,707	10,951
<b>Cervical laceration requiring suture or repair</b>	8	6
<b>Heavy bleeding/hemorrhage with estimated blood loss in excess of 500cc</b>	9	8
<b>Uterine perforation</b>	2	1
<b>Other complication</b>	6	6

**Table 15. Total and resident induced abortions, 1980-2024**

Year	Occurring in Minnesota	Minnesota residents	Resident percent	Resident rate*

## Tables – 2023 Data Updated

Minn. Stat. § 145.4134 requires that each yearly report provide the statistics for any previous calendar year for which additional information from late or corrected reports was received, adjusted to reflect these new numbers. In 2023, supporting statute 145.4246 was repealed.

Following the publication of the report for calendar year 2023 in December of 2024, 587 additional *Report of Induced Abortion* forms were received. Corrected tables for 2023 are republished here.

**Table 1.1. Abortions by month and facility, 2023**

Facility	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total

**Table 14. Intraoperative complications, 2023**

Complication occurring at the time of the abortion procedure. Complication reporting allows marking all that apply; thus, totals may not match the total number of abortions and so are not shown.

Intraoperative complication	Occurring in Minnesota	Minnesota residents
<b>No complications</b>	14,611	11,503
<b>Cervical laceration requiring suture or repair</b>	11	4
<b>Heavy bleeding/hemorrhage with estimated blood loss in excess of 500cc</b>	8	7
<b>Uterine perforation</b>	1	1
<b>Other complication</b>	82	67

## Minn. Stat. § 145.4131

### 145.4131 RECORDING AND REPORTING ABORTION DATA.

Subdivision 1. **Forms.** (a) Within 90 days of July 1, 1998, the commissioner shall prepare a reporting form for use by physicians or facilities performing abortions. A copy of this section shall be attached to the form. A physician or facility performing an abortion shall obtain a form from the commissioner.

- (b) The form shall require the following information:
- (i) the number of abortions performed by the physician in the previous calendar year, reported by month;
  - (2) the method used for each abortion;
  - (3) the approximate gestational age expressed in one of the following increments:
    - (i) less than nine weeks;
    - (ii) nine to ten weeks;
    - (iii) 11 to 12 weeks;
    - (iv) 13 to 15 weeks;
    - (v) 16 to 20 weeks;
    - (vi) 21 to 24 weeks;
    - (vii) 25 to 30 weeks;
    - (viii) 31 to 36 weeks; or
    - (ix) 37 weeks to term;
  - (4) the age of the woman at the time the abortion was performed;
  - (5) complications, if any, for each abortion and for the aftermath of each abortion. Space for a description of any complications shall be available on the form;
  - (6) the medical specialty of the physician performing the abortion; and
  - (7) if the abortion was performed via telehealth, the facility code for the patient and the facility code for the physician.

Subd. 2. **Submission.** A physician performing an abortion or a facility at which an abortion is performed shall complete and submit the form to the commissioner no later than September 30 for abortions performed in the previous calendar year. The annual report to the commissioner shall include the methods used to dispose of fetal tissue and remains.

Subd. 3. **Additional reporting.** Nothing in this section shall be construed to preclude the voluntary or required submission of other reports or forms regarding abortions.

**History:** 1998 c 407 art 10 s 2; 2015 c 71 art 8 s 43; 1Sp2017 c 6 art 10 s 95; 1Sp2021 c 7 art 6 s 28; 2023 c 70 art 4 s53,54

## Minn. Stat. § 145.4134

### 145.4134 COMMISSIONER'S PUBLIC REPORT.

- (a) By December 31 of each year, the commissioner shall issue a public report providing statistics for the previous calendar year compiled from the data submitted under sections 145.4131 to 145.4133 and sections 145.4241 to 145.4249. Each report shall provide the statistics for all previous calendar years, adjusted to reflect any additional information from late or corrected reports. The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the forms under section 145.4131 must be included in the public report, except that the commissioner shall maintain as confidential, data which alone or in combination may constitute information from which an individual having performed or having had an abortion may be identified using epidemiologic principles.
- (b) The commissioner may, by rules adopted under chapter 14, alter the submission dates established under section 145.4131 for administrative convenience, fiscal savings, or other valid reason, provided that physicians or facilities submit the required information once each year and the commissioner issues a report once each year.

**History:** 1998 c 407 art 10 s 5; 2003 c 14 art 2 s 1; 2022 c 98 art 14 s 8; 2023 c 70 art 4 s 55

## Minn. Stat. § 145.423

### 145.423 RECOGNITION OF INFANT WHO IS BORN ALIVE.

**Subdivision 1. Recognition;** care. An infant who is born alive shall be fully recognized as a human person, and accorded immediate protection under the law. All reasonable measures consistent with good medical practice, including the compilation of appropriate medical records, shall be taken by the responsible medical personnel to care for the infant who is born alive.

Subd. 2. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

Subd. 3. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

Subd. 4. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

Subd. 5. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

Subd. 6. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

Subd. 8. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

Subd. 9. MS 2022 [Repealed, 2023 c 70 art 4 s 113]

**History:** 1976 c 170 s 1; 1997 c 215 s 4; 2015 c 71 art 8 s 44; 2023 c 70 art 4 s 56,112

## Definitions

- **Induced abortion:** The purposeful interruption of an intrauterine pregnancy with the intention other than to produce a liveborn infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following a fetal death.
- **Fetal death:** Death prior to the complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of pregnancy. The death is indicated by the fact that, after such expulsion or extraction, the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.
- **Fetal remains:** Minn. Stat. § 145.1621, subd 2: The remains of a dead offspring of a human being that has reached a stage of development so that there are cartilaginous structures, fetal or skeletal parts after an abortion or miscarriage, whether or not the remains have been obtained by induced, spontaneous, or accidental means.

## Method of abortion

### Surgical procedures

- **Dilation and curettage (D&C):** Surgical procedures performed prior to 14 weeks 0 days gestation are called dilation and curettage (D&C) procedures. Other terms for this type of procedure include: **aspiration curettage, suction curettage, manual vacuum aspiration, or menstrual extraction.** This type of procedure may also be called **sharp curettage**, if a sharp curette is used to confirm complete evacuation of uterine contents. A very early termination by D&C is sometimes called **menstrual regulation.**
- **Dilation and evacuation (D&E):** Surgical procedures performed after 14 weeks 0 days gestation are called dilation and evacuation (D&E) procedures. This type of surgical procedure typically requires a greater degree of cervical dilation and the use of grasping forceps.
- **Hysterectomy/otomy:** Termination of pregnancy by removing the fetus through an incision in the uterus or by removing the uterus.

### Medical methods

Administration of medication to induce abortion. The medicines used for the ACOG endorsed and FDA approved protocols include mifepristone (also called RU486 or Mifepristone®). Other options for early medical termination of pregnancy include methotrexate (Amethopterin, MTX) and misoprostol (Cytotec®). Each of these medications can be used alone or in combination with each other.

- **Intra-uterine instillation:** Termination of pregnancy induced through intra-amniotic injection (amniocentesis-injection) of a substance such as saline, urea, or a prostaglandin.

## Data collection instruments

- Report of Induced Abortion, Revised (2023)
- Instructions: Report of Induced Abortion

**15. METHOD OF TERMINATION** (Check only the method that terminated the pregnancy)

Surgical (check the type of surgical procedure)

- D & C (Dilation and Curettage)\*
- D & E (Dilation and Evacuation)
- Hysterectomy/Hysterotomy
- Other surgical (specify) \_\_\_\_\_

Medical/Non-surgical - includes early medical terminations and labor induction (check the principle medication or medications)

- Mifepristone (RU486, Mifeprex\*)
- Misoprostol (Cytotec\*), or another prostaglandin\*\*
- Methotrexate (Amethopterin, MTX)
- Other medication (specify) \_\_\_\_\_

- Intrauterine Instillation (intra-amniotic injection, typically with saline, prostaglandin, or urea)
- Unknown

\* Additional terms that may be used include: aspiration curettage, suction curettage, manual vacuum aspiration, menstrual extraction, and sharp curettage.

\*\* Some commonly used prostaglandins include misoprostol (Cytotec\*) and dinoprostone (also known as Cervidil\*, prepidil, prostin E2, or dinoprostol).

**16. INTRAOPERATIVE COMPLICATION(S) FROM INDUCED ABORTION**

Complications that occur during and immediately following the procedure, before patient has left facility  
(check all that apply)

- No complications
- Cervical laceration requiring suture or repair
- Heavy bleeding/hemorrhage with estimated blood loss of  $\geq 500\text{cc}$
- Uterine perforation
- Other (specify) \_\_\_\_\_

\*for post-operative complications, please refer to the REPORT OF COMPLICATIONS(S) FROM INDUCED ABORTION

# REPORT OF INDUCED ABORTION

## Mandated reporters

All physicians or facilities that perform induced abortions by medical or surgical methods.

## Induced abortion defined

For purpose of these reports, induced abortion means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. **This definition excludes management of prolonged retention of products of conception following fetal death.**

## Importance of induced abortion reporting

Reports of induced abortion are not legal records, but reporting is required by state law (§145.4131). The data they provide are very important from both a demographic and a public health viewpoint. Data from reports of induced abortion provide unique information on the characteristics of women having induced abortions. Uniform annual data of such quality are nowhere else available. Medical and health information is provided to evaluate risks associated with induced abortion at various lengths of gestation and by the type of abortion procedure used. Information on the characteristics of the women is used to evaluate the impact that induced abortion has on the birth rate, teenage pregnancy and the health of women of reproductive age. Because these data provide information important in promoting and monitoring health, it is important that the reports be completed accurately.

## Physician and patient confidentiality

According to MN Statutes §145.4134, the commissioner shall issue a public report providing statistics for the previous calendar year compiled from the data submitted under section 145.4131. Each report shall provide the statistics for all previous calendar years, adjusted to reflect any additional information from late or corrected reports. The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the form under section 145.4131 must be included in the public report except that the commissioner shall maintain as confidential data which alone or in combination may constitute information from which, using epidemiologic principles, an individual having performed or having had an abortion may be identified. However, service cannot be contingent upon a patient answering, or refusing to answer, questions on this form.

# REPORTING PROCEDURE

## COMPLETION AND SUBMISSION OF REPORTS

### 1. Reporting by physician or facility

The Minnesota Department of Health (MDH), Center for Health Statistics, encourages physicians and facilities to develop internal policies for the completion and submission of the Report of Induced Abortion. MDH recommends that these policies designate either the physician or the facility as having the overall responsibility and authority to see that the report is completed and filed on time. This may help prevent duplicate reporting and failure to report. If facilities take the responsibility to report on behalf of their physicians MDH suggests the following reporting procedure:

- Notify physicians that the facility will be reporting on their behalf.
- Call the Minnesota Center for Health Statistics for assignment of facility and physician reporting codes (See instructions #2-3). (800-657-3900)
- Assign physician reporting codes to physicians and maintain a list of these assignments.
- Develop efficient procedures for prompt preparation and filing of the reports.
- Prepare a complete and accurate report for each abortion performed. Reports must be submitted on-line via the web-based reporting system<sup>2</sup> unless the facility reports only a few procedures per year. In that case a paper copy of the form may be printed from the web site and submitted via U.S. mail or submitted via fax (800-269-7194).<sup>3</sup>
- Submit the reports to the Minnesota Center for Health Statistics within the time specified by the law.
- Cooperate with the Minnesota Center for Health Statistics with queries on report entries.
- Call the Minnesota Center for Health Statistics for advice and assistance when necessary (800-657-3900).

If a facility chooses not to report on behalf of their physicians and for physicians who perform induced abortions outside a hospital, clinic or other institution, the physician performing the abortion is responsible for obtaining a physician reporting code from MDH (See instruction #3), collecting all of the necessary data, completing the report and filing it with the Minnesota Center for Health Statistics within the time period specified by law (See instruction #7).

### 2. Facility reporting codes

All facilities reporting on behalf of physicians must be assigned a reporting code from MDH. This code is in addition to individual physician reporting codes (See instruction #3). Facilities must submit a name

---

<sup>2</sup> [MR&C: https://vital.health.state.mn.us/mrc/faces/xhtml/home/MrcHomePage.xhtml](https://vital.health.state.mn.us/mrc/faces/xhtml/home/MrcHomePage.xhtml)

<sup>3</sup> [Induced Abortion in Minnesota: https://www.health.state.mn.us/data/mchhs/pubs/abrpt/index.html](https://www.health.state.mn.us/data/mchhs/pubs/abrpt/index.html)

and address to receive a facility code. Facilities that have been reporting to MDH prior to January 1, 2017, may continue to use the previously assigned code for current reporting.

### **3. Physician reporting codes**

All physicians must be assigned a reporting code to submit a Report of Induced Abortion. Reports submitted without a physician reporting code will be considered incomplete. To obtain a code, physicians, or facilities reporting on behalf of physicians (See instruction #1) must call MDH to be assigned one code per physician. MDH will require that a valid mailing address be provided for the purposes of contacting the physician if a report is incomplete or needs corrections, but no other identifying information will be asked or accepted. Addresses provided may be a business address or an address established by the physician or facility, such as a PO Box. If facilities are reporting on behalf of their physicians, the facility address may be used.

### **4. One report per induced termination of pregnancy**

Complete one report for each termination of pregnancy procedure performed.

### **5. Criterion for a complete report**

All items on the report should have a response, even if the response is "0," "None," "Unknown," or "Refuse to Answer."

### **6. Detailed instructions for completing a report**

A User Guide with detailed descriptions of each data item and instructions for completing and submitting the report using the web-based reporting system can be found on the MDH website at [Induced Abortion in Minnesota \(https://www.health.state.mn.us/data/mchs/pubs/abrpt/index.html\)](https://www.health.state.mn.us/data/mchs/pubs/abrpt/index.html).

### **7. Submission dates**

Reports should be completed and submitted to the Center for Health Statistics as soon as possible following each procedure. MDH encourages facilities and physicians submit reports monthly, but the final date for submitting reports is September 30 of the following calendar year. (MN Statutes §145.4131)

#### **MINNESOTA STATE LAW**

##### **ARTICLE 10, HEALTH DATA REPORTING**

§145.4131 [RECORDING AND REPORTING ABORTION DATA.] Subdivision 1. [FORMS.] (a) Within 90 days of July 1, 1998, the commissioner shall prepare a reporting form for use by physicians or facilities performing abortions. A copy of this section shall be attached to the form. A physician or facility performing an abortion shall obtain a form from the commissioner. (b) The form shall require the following information: (1) the number of abortions performed by the physician in the previous calendar year, reported by month; (2) the method used for each abortion; (3) the approximate gestational age expressed in one of the following increments: (i) less than nine weeks; (ii) nine to ten weeks; (iii) 11 to 12 weeks; (iv) 13 to 15 weeks; (v) 16 to 20 weeks; (vi) 21 to 24 weeks; (vii) 25 to 30 weeks; (viii) 31 to 36 weeks; or (ix) 37 weeks to term; (4) the age of the woman at the time the abortion was performed; (5) complications, if any, for each abortion and for the aftermath of each abortion. Space for a description of any complications shall be available on the form; (6) the medical specialty of the physician performing the abortion; and (7) if the abortion was performed via telehealth, the facility code for the patient and the facility code for the physician. Subd. 2. Submission. A physician performing an abortion or a facility at which an abortion is performed shall complete and submit the form to the commissioner no later than September 30 for abortions performed in the previous calendar year. The annual report to the commissioner shall include the methods used to dispose of fetal tissue and remains. Subd. 3. Additional reporting. Nothing in this section shall be construed to preclude the voluntary or required submission of other reports or forms regarding abortions.
