In Appreciation

The Minnesota Student Survey (MSS) Interagency Team is indebted to the students, parents, teachers, district assessment coordinators, school and district administrators, principals, and superintendents across the state that agreed to participate in and supported the MSS when it was administered in the first half of 2025. These data are made available as a result of their interest and time, and we are grateful for their efforts.

The planning and implementation of the 2025 Minnesota Student Survey administration resulted from an important collaborative effort among members of the MSS Interagency team, local educators and health professionals, researchers, and community members throughout the state of Minnesota – all of whom encouraged and supported school participation in the MSS.

Members of the MSS Interagency Team include Seyma Birinci, Tai Do, Holly Ponto, and Lana Peterson at the Department of Education; Bob Kuziej, Kat Panas, Molly Meyer, Mark Lee, and Dan Fernandez-Baca at the Department of Health; Phyllis Bengtson, Jeffrey Carpenter, Andrea Orengo, Michele Maruska, Marcos Perez, and Andrea Abel at the Department of Human Services; and Amy Dorman at the Department of Public Safety.

We also thank Allie Hawley March at the Department of Health, Maira Rosas-Lee (formerly with the Department of Education), and Jacquelyn Freund of EpiCog for their valuable contributions to the successful collection of 2025 MSS data.

2025 Minnesota Student Survey

Survey Participation

The 2025 Minnesota Student Survey (MSS) was administered in the first half of 2025 to students in grades 5, 8, 9, and 11 statewide. The survey was voluntary at all levels; districts, schools, parents, and students could all choose to opt out. Many traditional public school districts (61%) chose to participate. Across the state, approximately 50% of fifth graders, 50% of eighth graders, 46% of ninth graders, and 36% of eleventh graders participated in the 2025 MSS. Overall participation across the four grades was approximately 45% of total enrollment.

Results from regular public schools, charter schools, and online schools are included in these tables. Results from nonpublic schools, alternative learning centers, and juvenile correctional facilities are released separately.

All schools and districts that participated in the survey followed federal laws regarding parental notification as required by the Protection of Pupil Rights Amendment (PPRA). PPRA requires that schools that participate in the survey notify parents of the survey administration, provide parents the opportunity to review the survey instrument, and allow parents to opt their child out of participating (Juvenile Correctional Facilities are exempt from this requirement).

Mode of Administration

In 2025, all levels of the MSS were administered online. Only Juvenile Correctional Facilities could choose to administer the MSS on paper.

Items on the Tables

The tables in this report include the responses for all survey items. Items are ordered within the tables by an overarching subject area; the order that items appear on the tables is not necessarily the order that they appeared on the survey.

The table of contents is provided on pages vi-vii. The grade five survey version was shorter than the grade eight survey version, which in turn was shorter than the grade nine and eleven version. The grade five and grade eight versions did not include items appropriate only for older students. Items found on some versions of the survey but not on others are identified on the tables.

Gender Breakdown in Reports

This report comes in two formats: by grade and grade-and-gender. Fifth grade surveys asked “are you a boy or girl” while all other grades were asked about their sex assigned at birth (as on original birth certificate). The grade-and-gender breakdowns are available when counts for sex assigned at birth are at least 25 male and 25 female respondents in each grade level cell.

New Questions and Year-to-Year Comparisons

While most MSS survey questions stayed the same as previous administrations, other questions were updated with changes to the question or response options. Some entirely new questions were added, and some questions were dropped. New questions are noted on each table. Caution must be used when making comparisons over time for any questions in which the wording has changed.

Please note that although these surveys are given repeatedly over time, the student populations change between administrations of the survey.

Validity of Responses

Caution was taken to identify invalid responses and remove them from the survey results. Surveys were removed when responses were highly inconsistent, when there was a pattern of likely exaggeration, when the survey was completed outside of school hours (this did not apply to online students), or when the survey was clearly a test of the online system. In addition, surveys were removed when only the background section of the survey was answered. In total, approximately 3.5% of cases were removed from the 2025 survey data.

Online Access to MSS Data

Data from the Minnesota Student Survey (MSS) are available on the Minnesota Department of Education's [Data Reports and Analytics page](#) (<https://pub.education.mn.gov/MDEAnalytics/DataTopic.jsp?TOPICID=242>). This web report provides access to all state, county, and district level data and provides options for filtering the data in multiple ways.
