**Weight Status in Children Ages 2 to 5 Years Participating in Minnesota WIC
by Calendar Year, City of Residence and Race/Ethnicity Alone or In Combination with Other Races
Minnesota WIC Information System**

NH=Non Hispanic

Numbers suppressed if total population by race/ethnicity

is between 1 and 5 **** and/or denominator is <30 (****)

Individuals identifying with more than one race are counted in each race category.

All percentile data are taken from the 2000 CDC Growth Charts

Analyses based on one randomly selected record per child. Excludes records with unknown data or errors.

Biologically implausible values (BIV) for weight, height and BMI at a z score +5 removed, which is consistent with previous MN WIC reports for years 2011 to 2016.

For 2017, BIV was defined for weight z score <-5 and >8; height z score <-5 and >4; BMI z score <-4 and >8.

Suggested Citation: MN WIC Information System. Weight Status in Children Ages 2 - 5 Years of Age

Participating in MN WIC by Calendar Year, City of Residence and Race/Ethnicity Alone or in Combination with Other Races. MN WIC Program: 2022.

For more information contact: Minnesota WIC Program 1 (800) 657-3942

¹City of child's last known address as of January 2017. Cities and close city groups

with 100 or more births during 2012 were chosen for this list with the exception of Edina.

²Total number of children with biologically plausible weight and height measurements

³Includes children from US and foreign born

⁴Includes both African-Americans and African participants

⁵Overweight is a weight-for-height percentile > 85 and <95 using the CDC 2000 reference population.

⁶Obese is a weight-for-height percentile > 95 and <97.5 using the CDC 2000 reference population.

⁷Very Obese is a weight-for-height percentile > 97.5.
