

CAREGIVER ENROLLMENT PROCESS

for Minnesota's Medical Cannabis Program

STEP ONE

1

Patient adds caregiver's information to their account.

This generates an email to the caregiver that contains registration instructions.

NOTE: A patient's parent, legal guardian or spouse registers at the same time their patient does (they do not register separately as a caregiver).

STEP TWO

2

Caregiver completes their registration online.

They should have an image of their government-issued photo ID, driver's license or passport ready to upload.

STEP THREE

3

Caregiver prints and completes the background check form and returns it.

Caregiver prints and completes the background check form and mails it to the MN Bureau of Criminal Apprehension, along with a \$15 check/money order and a stamped envelope addressed to the Office of Medical Cannabis.

STEP FOUR

4

Check email for confirmations.

Once the background check is approved, both patient and caregiver receive an email notifying them that the caregiver can pick up the patient's medical cannabis.

NOTE: Background checks can take up to 30 days.
